

### **III. REMARKS**

A brief review of the status of the claims in this application is believed to be appropriate.

In the Office Action the Examiner indicated that:

15-17 had been withdrawn,

21-31 were allowed;

18-20, 32, 36,38, 48-50 and 54-57 were rejected on an obviousness type double patenting basis which could be resolved by a terminal disclaimer, and;

33-35, 37, 39-47 and 51-53 were objected to as being dependant on previously rejected claims.

By this amendment, the applicant has cancelled claims, amended claims and filed a terminal disclaimer so as to place the entire application in condition for allowance. The claims will be discussed in groupings so as to facilitate an understanding of issues herein.

Claims 18-20 have been cancelled without prejudice and with the right to file a continuation application being retained.

Claims 21-31. Claim 21 has been amended by changing cylindrically to tubularly in two places and inserting the requirement that the upper portion of the module be arcuately shaped. Claim 24 has been amended by requiring the bottom portion to be flat. In Claim 26, cylindrically has been changed to tubularly and is consistent with its parent Claim 21. Other than these changes, Claims 21-31 are the same as those previously allowed. It is respectfully submitted that these changes should not impact the previous allowance of these claims nor necessitate a new search.

Claims 32-49. In this group, claims 32, 36, 38, 48 and 49 were rejected on the basis of double patenting over the commonly owned U.S. Patent 6,740,232. The applicant has filed a terminal disclaimer herewith which obviates the double patenting issue. Since the rejection of those claims has been resolved by the terminal disclaimer, it is respectfully submitted that the remaining claims 33, 34, 35, 37, 39, and 40-47 no longer depend from a

previously rejected claim and are thus patentable. It is respectfully submitted that the entire group 32-49 is presently patentable.

Claims 50-57. In this group, Claims 50 and 54-57 have been rejected on the basis of obviousness type double patenting. Claims 51-53 have been indicated to be allowable but were objected to as depending from a previously rejected claim. The terminal disclaimer resolves rejection as to claims 50 and 54-57. Therefore, those claims are submitted to be patentable. The objection as to claim 51-53 depending from previously rejected claims has been removed and submitted that those claims are similarly patentable.

The terminal disclaimer filed herewith disclaims the terminal portion of this patent which may extend beyond the term of U.S. Patent 6,740,232. It is to be noted that U. S. Patent 6,740,232 and this patent are commonly owned. A copy of the assignment in the '232 patent file is also enclosed herewith and will be noted that all continuations and divisions of that case are assigned. This present application is a division of that application.

**CONCLUSION**

Based upon this amendment, the claims currently in this case and grouped as 21-31, 32-49, and 50-57 are allowable. Allowance is respectfully requested.

Respectfully submitted,
